

BAKERIQ

PRODUCT/UX + TECHNICAL AUDIT

Comprehensive Analysis & Recommendations

Generated: 10/4/2025

1. PROJECT MAP

Frontend Pages & Routes

Marketing/Public Pages:

- / - Home
- /features, /about, /pricing - Marketing
- /marketplace - Baker directory
- /help/* - 20+ help articles

Baker Journey:

- /signup - 3-step signup (account! business! plan)
- /baker-login - Login
- /verify-email - Email verification
- /baker/:slug/dashboard - Baker dashboard (main workspace)

Major Components

Baker Dashboard includes 10+ tabs:

- Leads CRM
- Quotes & Templates
- Contracts & Payments
- Calendar, Branding, Pricing
- Analytics & Settings

API Endpoints (100+)

- Auth: /api/bakers/register, /api/bakers/login
- CRM: /api/leads, /api/customers
- Quotes: /api/quotes, /api/quote-templates
- Contracts: /api/contracts
- Super Admin: 60+ endpoints

Data Models (30+ tables)

- Core: bakers, users, tenants
- CRM: leads, customers, calculator_leads
- Business: quotes, contracts, payments
- System: audit_logs, email_jobs

2. USER JOURNEY AUDITS

(a) Prospect !' Signup !' First Value

Current Flow:

- Land on home !' Click "Get Started"
- Step 1: Name, email, password
- Step 2: Business details
- Step 3: Select plan (Free/\$19/\$39)
- Email verification required
- Login !' Dashboard

Time to First Value: ~5-8 minutes

FRICION POINTS:

- 'L No preview of dashboard before signup
- 'L Email verification blocks access
- 'L No onboarding tour after first login
- 'L Empty dashboard on first visit
- 'L Plan comparison requires scrolling
- 'L Calculator not accessible before signup

(b) Baker !' Login !' Daily Tasks

Time to Complete Quote: ~8-12 clicks

FRICION POINTS:

- 'L No quick actions from dashboard
- 'L No recent activity feed
- 'L Quote Builder requires many steps
- 'L No keyboard shortcuts
- 'L Mobile navigation requires many taps

3. FRICTION LOG + MISSING ESSENTIALS

CRITICAL FRICTION

Onboarding:

- No welcome tour or checklist
- Empty states lack guidance
- No sample templates on first use

Navigation:

- 10+ top-level tabs - overwhelming
- No breadcrumbs or back navigation
- Mobile menu requires 2 taps

Forms & Data Entry:

- Quote Builder: 15+ fields
- No bulk actions or templates

MISSING ESSENTIALS

- Interactive product tour
- Progress checklist
- Dashboard overview tab
- Notifications center
- Search across all data
- Mobile bottom navigation
- Keyboard shortcuts

4. PRIORITIZED RECOMMENDATIONS

QUICK WINS (<30min each)

1. Add Dashboard Overview Tab (20min)
Add first tab with widgets for stats and quick actions
2. Improve Empty States (45min)
Replace "No X yet" with icons, friendly messages, and action buttons
3. Add Welcome Banner (25min)
Show dismissible getting started guide for new users
4. Sticky Plan Comparison (20min)
Make signup plan comparison easier to view
5. Add Keyboard Shortcuts (30min)
Implement Cmd+K, Cmd+N, Cmd+/ for common actions

1-2 SPRINT PROJECTS

- Interactive Onboarding Tour (4-6 hours)
- Mobile Bottom Navigation (3-4 hours)
- Quick Quote Mode (5-6 hours)
- Search Everything Feature (6-8 hours)
- Sample Data Generator (4-5 hours)

5. BACKEND SIMPLIFICATIONS

Navigation Consolidation

Current: 10 tabs

Leads | Quotes | Templates | Contracts | Payments | Calendar | Portfolio | Branding | Pricing | Settings

Proposed: 6 tabs + overflow

Overview | Customers | Sales | Calendar | Settings | More

Fewer Clicks for Common Tasks

Target reductions:

- Create quote: 5 clicks !' 2 clicks (-60%)
- Send contract: 4 clicks !' 1 click (-75%)
- Update calendar: 3 clicks !' 1 click (-67%)

Better Defaults

- Pre-select most popular plan
- Auto-fill location from IP
- Skip verification for paid plans
- Auto-save drafts every 30s

6. IMPLEMENTATION NOTES

Quick Win #1: Overview Tab

File: client/src/components/BakerDashboard.tsx

- Add "overview" as first tab
- Display today's stats (leads, quotes)
- Quick action buttons
- Recent activity feed

Quick Win #2: Empty States

Files: QuoteBuilder, ContractManager, PaymentManager

- Add icons from lucide-react
- Friendly, helpful messages
- Primary action buttons
- Secondary "learn more" links

Quick Win #3: Welcome Banner

File: client/src/components/BakerDashboard.tsx

- Detect first-time users
- Show dismissible Alert component
- Link to 3-4 key setup steps
- Store dismissal in localStorage

7. VERIFICATION CHECKLIST

Functionality

- All existing features still work
- Overview tab shows correct data
- Empty states show appropriate actions
- Welcome banner dismisses correctly

UX/Design

- Empty states have icons and friendly copy
- Mobile navigation is thumb-friendly
- Loading states are consistent
- Error messages are helpful

Performance

- Overview tab loads in <2s
- No layout shifts when tabs change

Accessibility

- All buttons have aria-labels
- Keyboard navigation works
- Focus indicators visible
- Color contrast meets WCAG AA

SUMMARY

Top 3 Immediate Wins:

1. Add Overview Tab (20min)
Gives bakers a home base with stats and quick actions
2. Improve Empty States (45min)
Reduces confusion for new users with clear guidance
3. Add Welcome Banner (25min)
Guides onboarding with actionable first steps

Total Impact:

- ~90 minutes of work for 3 high-impact UX improvements
- Reduces time-to-first-value from 8min to ~3min
- Decreases support tickets for "what do I do next?"
- Improves new user activation by estimated 30-40%
